The 5-Elements

WHITE PAPER

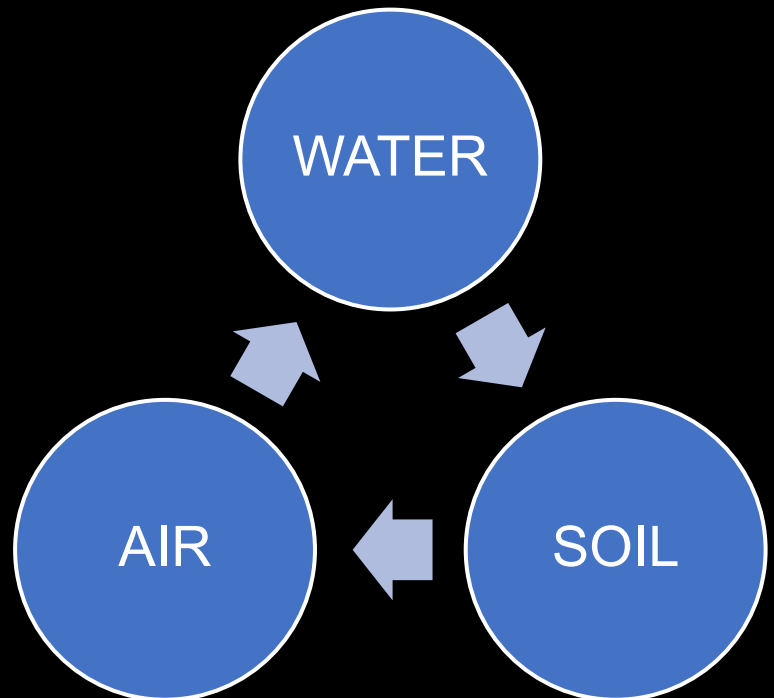

Ayurveda Potion

Made in Bharat

TOC

- 1) Introduction
- 2) The Problem Vs Symptoms
- 3) In-Situ Solution
- 4) Sustainability and Scalability
- 5) Constructive Development

Introduction

Everything in Ecology is just a Food to be consumed in a Cycle of Life. And whatever NOT consumed becomes a Pollution--- A Food stuck at the Wrong Place in a Cycle.

Carbon in Air is a Pollution, although a Food for the Soil.

The Wheel of Life revolves around the Axis of Water for keeping the balance of 5-Elements:-

- 1) Earth
- 2) Space
- 3) Air
- 4) Fire
- 5) Water

The only way to consume and produce Food is Photosynthesis, which all the 5-Elements together make it happen. And these **5-Elements are NOT a substance**, but actually an Energy in Motion.

If any of the Element stops functioning, the Cycle stops for all the 5, thus stopping both production and consumption, leading to what we call **Pollution, Pandemics, Climate Change, Global Warming and Deadly Chemicals in our Food Chain**.

Either, we need to keep **Healing the 5-Elements** Or Ecology will realign the Cycle leading to, so called, Natural Calamities or Environmental Disasters.

Keeping all the 5-Elements Healthy is the only way for Humanity to Live in Harmony with Nature. And for that Water is the Key to re-establish the balance and that's the reason, there is an adage in all Indigenous Languages, **"Water is Life"**.

Healing Water in the presence of all the other 4-Elements sets a chain reaction of Healing the complete Cycle, and for that we need to understand the ways of Nature, an Ecology, the ways of all other Life, living in perfect Harmony with Nature.

Humans are the only Animals living to control Nature for Destructive Development and the **Solution we need should be In-Situ** with our Lifestyle or else it will fail against our Greed for more comforts and Fear of Losing the existing ones, as is happening since our existence.

Luckily we got the ONE with 100% Perfect Results, In-Situ Conditions.

Revolutionary Technology from Nature for Nature with Nature.

पञ्च-तत्त्व

The 5-Elements

The Problem Vs Symptoms

Nature is bleeding due to Destructive Human Development and it will surely realign the 5-Elements of Life, to get the Balance back.

And that will create the havoc which we have already started witnessing across the World in the form of Floods, Droughts, Wild Fires, Water Scarcity and high AQI- Air Quality Index.

Humanity is already struggling with following Social, Economic and Political problems around Food, Water, Energy and Pollution:-

- 1) Villages struggling with “Diseases, Pests and Weather” in Agriculture, Aquaculture and Animal Husbandry creating Food Scarcity.
- 2) Unemployment as Cities can't generate Jobs for masses.
- 3) Migration to Cities creating Water, Soil and Air Pollution.
- 4) Sewage and Waste Management creating Water Scarcity.
- 5) Stray Animals for Livestock wastage and liability.
- 6) Floods.
- 7) Droughts.
- 8) Deadly Chemicals in Food Chain.
- 9) Energy generation from Fossil Fuels or Water Dams creating Energy Scarcity.
- 10) Desertification.
- 11) Wild Fires.
- 12) Pandemics

But the irony is that all these Problems are INTERRELATED, one leading to another, and our approach till now is, to keep fighting the Symptoms rather than the Root Cause.

Though Nature and Indigenous Languages keep pointing towards the Solution hidden inside the Nature itself, we never took it seriously.

And here we are, still trying to figure out the meaning of One Earth, One Family, One Future.

Pollution is always Local but its effects are Global and by no means we can contain that to One region or Country, because in Ecology everything is connected.

Root Cause of all the Symptoms (THE PROBLEMS) is the stoppage of Water Cycle, the Vertical Flow- High Pressure to Low Pressure Water Movement in Soil.

And that stops the Food Cycle for consumption, leading to Pollution, an Imbalance of 5-Elements. Only Flowing Water stays Alive and keeps every other Element Healthy.

Rivers flow only when they get Water from the Soil below, with Water Cycle Alive or else they dry out.

The 5-Elements

In-Situ Solution

We have developed an Ayurveda Potion, which can be tested by any competent authority or Government Organization across the World:-

- 1) 100% Plants based Potion to be mixed with Borewell Water, for treating Water Bodies only.
- 2) No synthetic Chemicals in any form.
- 3) No Living Organisms like Bacteria or Enzymes.
- 4) Ingredients/Recipe are our Trade Secret.
- 5) Potency, Quantity and Frequency of its Dosing will vary based on how the Water Body responds to the Treatment.

It works by enabling the Vertical Flow of Water Bodies for their Resuscitation & Rejuvenation and in the process making them a **Natural Carbon Sink**, for solving the following Real Problems **in-Situ Conditions**:-

- 1) Biodiversity of Aqua and Avian Life for completing the Food Chain.
- 2) Foul Smell.
- 3) Algal Blooms.
- 4) Weeds.
- 5) Sludge/Effluents.
- 6) Salinity.
- 7) Mosquitoes.
- 8) Viscosity/Turbidity.
- 9) Carbon Emissions.
- 10) Aquifer/Ground Water Recharge.
- 11) Floods.
- 12) Drought.

Water Body should neither be Cemented/Laminated from the bottom nor should covered from the top. Using this we can convert:-

- 1) Any City to an **Ecological Smart City** with unlimited supply of Water, Zero Air, Soil and Water Pollution for Healthy and Clean Water Bodies including Drains, Rivers, Ponds and Lakes, and Greenery for all Life forms.
- 2) Any Village to an **Ecological Smart Village** with “Diseases, Pests and Weather Resilient Farms’ for a **Chemicals Free Agriculture, Aquaculture and Animal Husbandry** to increase Farmers income manifold to stop their Migration to Cities and thus solving Food, Water and Energy Scarcity.
- 3) **Barren and Waste Lands including Deserts to a Forest** for Biomass cultivation to run Biomass Energy Plants leading to replace Fossil Fuel and Dams for Dispatchable Baseload Electricity.

The 5-Elements

Sustainability and Scalability

Plants we used for preparing our Potion are readily available and can be cultivated in mass on our Farms and thus can be made available for serving the Global market.

With Zero Capex and No new Special Skills needed for execution, implementation is easier and can be charged on an Opex Model with a continuous Results based Payment Schedule.

For Water Bodies Rejuvenation, we need the following:

- 1) Fresh Borewell Water in a Tanker or Tank.
- 2) Potion should be mixed in Borewell Water in the defined proportion.
- 3) Dosing should be done any time after 5pm.
- 4) Potion Bottle should be shaken well before usage.
- 5) Bigger the Surface Area of Water Body, faster will be the Results.

For Diseases, Pests and Weather Resilient Campus, we need the following:-

- 1) Pond whose Numbers and Size depends upon the Agriculture, Aquaculture and Animal Husbandry Output needed.
- 2) Biogas Plants for creating Slurry from Farm Waste to be used in Ponds.
- 3) Borewell Water to be used for filling the Pond and the pond Water will be used for everything and anything in the Campus.
- 4) A 1,000 Ltrs Tank for every Pond for our Treatment Dosing.
- 5) Integral Farming needs to be done for using the Output of all the 3 Domains, both for keeping it Chemicals Free and increasing the Income of Farmer.

The Campus approach can be used in **Goshalas for making them a Holistic Healing Centre** to generate Revenue from Stray Animals for a Self-Sustainable existence.

Life in both Cities and Villages will be a bliss with No Disease, No Floods, No Droughts, No Sewage, No Pollution, No Deadly Chemicals in Food and No Weather Blues for a Carbon Net-Zero Lifestyle in Harmony with Nature.

A Technology with Affordable Commercials, Ease of Execution, 100% Guaranteed On-Ground Results, In-Situ Conditions and No Side Effects.

A One Solution for keeping both Humanity and Ecology healthy and in harmony. A simple solution for the most complex problems of Earth, using the knowledge from our ancient understanding of Nature as a Living Force of 5-Elements.

पञ्च-तत्त्व

The 5-Elements

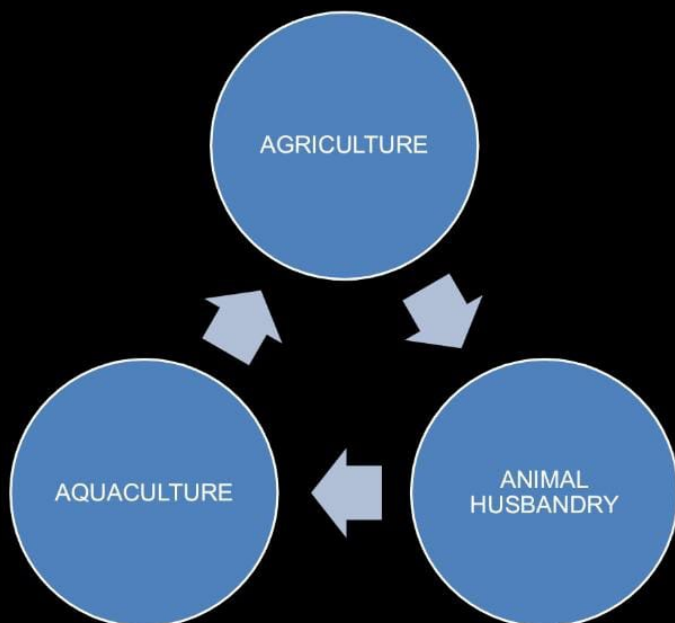

Constructive Development

Keeping the 5-Elements in balance In-Situ conditions, will only lead to Ecologically Sustainable Constructive Development, meeting UN's 17 SDGs.

- 1) Villages will provide employment to masses for Food, Water and Energy Business.
- 2) Cities will be home to Technologists, Economists and Politicians for driving policies for the World.
- 3) Zero Poverty and Hunger.
- 4) Development for more comfortable Life.
- 5) Education for understanding the Principles of Living in Harmony with Nature.

Business Opportunities around our Technology with Government across the World:-

- 1) Water Bodies Rejuvenation for keeping them Healthy as Carbon Sinks.
- 2) Sewage Management.
- 3) Air Pollution Mitigation.
- 4) Underground Water Recharge.
- 5) Floods and Droughts Mitigation.
- 6) Stray Animals Management.
- 7) Chemicals Free Food Chain.
- 8) Biomass Energy which is Renewable as well as Dispatchable Base Load.
- 9) Forest Management for controlling Wild Fires.
- 10) In-Situ Carbon Net-Zero.
